On the Subject of Web Design

Welcome to web design class. The first rule of web design is: You do not talk about Comic Sans MS. The second rule is: You DO NOT talk about Comic Sans MS. The third rule is: The word "color" is NEVER spelled with a U.

- A snippet of a CSS file will be displayed on the screen.
- Based on the information given, you have to Accept(√),
 Consider(△), or Reject(X) the code.

Stèp 1: Select the website

Find the correct website that this code was quoted from. Use the **Selector** part of the code (the part before {) to narrow it down to one site then noted down the **Threshold** value of it.

Elements: body, a, h3, blockquote IDs: #header, #comments Classes: .post, .title, .author Threshold: #00FF00 PNGdrop (image hosting) Elements: div, img IDs: #sidebar Classes: .username, .share, .large Threshold: #BADA55 Cinemax (video hosting) Elements: div, iframe, b, i IDs: #main, #rating, #comments Classes: .username, .share, .channel Threshold: #60061E Threshold: #501337 Stufflocker (cloud storage) Elements: body, div, img, a IDs: #main, #content, #sidebar Classes: .avatar, .username Elements: body, iframe IDs: #rating, #comments Classes: .rating, .fullscreen Threshold: #60061E Threshold: #501337 Steel Nexus (forum) Elements: body, div, img, blockquote IDs: #sidebar, #download Classes: .avatar, .reply Threshold: BO20E5 Threshold: #BEA61E	Edison Daily (news site)	Buddymaker (social media)

Classes: .menu, .author Classes: .avatar, .reply	Elements: div, h3, img, iframe	Elements: body, div, img, blockquote	
	IDs: #sidebar, #download	IDs: #header, #content, #sidebar	
Threshold: #BEA61E	Classes: .menu, .author	Classes: .avatar, .reply	
Threshold: #BEA61E			
	Threshold: B020E5	Threshold: #BEA61E	

Step 2: Find the color target

Find the first color name in the CSS file, then use the following table to determine a hexadecimal value of that color. This value is the Color Target that you will need later.

Color	Hex value	Color	hex value	Color	Hex value
Blue	#0000FF	Yellow	#FFFF 00	Red	# FF 0000
Green,	#00FF00	White	#FFFFFF	Orange	#FFA500
Purple	#800080	Magenta	#FFOOFF	Gray	#808080

Note:

The Hexadecimal value of color is denoted in #RRGGBB manner.

Step 3: Calculate site score

Please do the following:

- Starts with the amount of line in the code inside the {curly braces}. Counting semi-colon is a good idea because it is a line terminator.
- +3 score each for:
 - R value of the Color Target is less than R value of the threshold.
 - G value of the Color Target is greater than or equal to G value of the threshold.
 - B value of the Color Target is greater than B value of the threshold.
- +2 score for any margin/padding.
- +1 score for a border/border-radius unless it's 0px or 50%.
- -1 score for a z-index without a position.
- +1 score for a font-family unless it's "Comic Sans MS", which gives a -5 score.
- +2 score for a box-shadow/text-shadow unless it's none.
- x2 score if the buttons on the module are colored, or -3 score if they are gray.
- If you score is now negative or 0, keep adding 16 until it's positive.
- Add each digit together until it's a single digit, then use the following table to determine which button to push.

Accept(√)	Consider(△)	Reject(X)
2, 3, 5, 7	6 , 8	1, 4, 9
